

PRODUCT INFORMATION

Bath Finishes

Standard bath finish	Comes with a smooth and primed exterior, ready for the customer to paint when delivered.
Custom Factory Paint Finish	We offer a matt lacquered or gloss paint finish which is sprayed onto the bath in a selection of colours. Our colours are limited by our chart and we would suggest you visit a showroom to view our colour charts.
Hand Polished and Lacquered	The bath and feet are hand polished and lacquered, allowing the natural beauty of the cast iron to show through, while protecting the bath against water. Please note that the natural composition of the cast iron includes black marks and small indents on the surface.
Copper Clad Exterior	Hand pressed and lacquered onto each bath. This finish is unique, combining the beauty of copper with the strength and durability of cast iron, and is only available for the Usk.

Feet Finishes

Standard Feet Finish	Will come in the same finish of the bath unless ordered specially.
Hand Polished and Lacquered or Nickel or Chrome Plated	These finishes are available as extra from the bath finish if specified.

Waste Options

Please note, the plunger unit will not require an overflow hole drilled into the bath, please specify your waste option when ordering one of our baths so we can finish it as appropriate.

Plunger Unit	The Plunger comes with two options, above floor or below floor trap. The above floor trap will work with any bath on feet where access below the floor is limited. The below floor trap is suitable for a bath where plumbing runs under the floor. For the Usk bath we offer an adapted plunger with an underfloor trap, extended pipework and escutcheon. 150mm minimum clearance is required for this or the bath must be installed on a raised plinth. If you wish to set in your plunger into marble, we would need to know the thickness of this first to adapt our unit. For extra pipework please see Page 62.
Banjo-Unit	Recommended if you are not having a plunger unit for all our freestanding baths.
Waste plug, chain & overflow dome	Recommended for built in baths where the pipework is not visible.

Dalby Shower information

We offer our Dalby shower as standard for its pipework to go into the wall. If you would like an adaption kit to have the pipework going into the floor, please see Page 62.

Height: 300mm
Centre-to-centre (hot and cold inlets) width: 250mm
Overall shower size:
Overall height: 1360mm to 1800mm (adjustable)
Distance from wall to centre of rose: 550mm
Suitable for pumped or non-pumped systems between 1 to 4 BAR (minimum 22mm feed).

BATH INFORMATION

Bath Suggestions:
